Dear Future IB Math SL 2 Student,

Use the first paragraph to introduce yourself. Be creative and let your personality show!

Use the second paragraph to describe your experiences in this class and let this future student know what to expect throughout the year.

Use the third paragraph to offer some advice regarding how to be successful in this class. What worked for you? What didn't work?

Use the final paragraph to sum up your thoughts. Be sure to end on a positive note and offer some encouragement!

Kind Regards,

Karen Blackert
IB Mathematics Teacher
Myers Park High School
